

**C I R C U L A R No. 91**

Subject :- Production of extracts from documents.

In a case in the Baroda Region the applicant (trustee) applying for the registration of a trust created under a will only produced extracts from the will instead of the whole will. When the matter went before the District Court and the entire will was produced, it was found that the applicant had suppressed some clauses under which some more property was bequeathed for public charitable purposes. It was also found that when the will was read as a whole, the interpretation of the clauses referred to by him became clearer.

The Regional Officers should, therefore, always insist on the production of the whole document especially documents embodying trusts and not to accept only extracts.
