

# Mean Standard Deviation Method For Score Normalization

This examination is conducted in multiple shifts for the same syllabus, in spite of all efforts there are chances of variation in the difficulty level of the questions in various sessions. Thus the score obtained by the candidates of same caliber is likely to vary. In order to equalize the variation in the difficulty level of question papers a process called statistical normalization of marks is resorted to universally which is been accepted for this examination also.

Normalization of scores ensures that the marks accurately reflect the candidates' performance relative to the difficulty of the exam in every Shift. The mathematical process of normalization leads to increase or decrease of marks. Following Formula is universally accepted for this normalization.

$$\widehat{M}_{ij} = \frac{\bar{M}_t^g - M_q^g}{\bar{M}_{ti} - M_{iq}} (M_{ij} - M_{iq}) + M_q^{gm}$$

$\widehat{M}_{ij}$  = Normalized marks of  $j^{\text{th}}$  candidate in the  $i^{\text{th}}$  shift.

$\bar{M}_t^g$  = is the average marks of the top 0.1% of the candidates considering all shifts (No. of candidates will be rounded up)

$M_q^g$  = is the sum of mean and standard deviation marks of the candidates in the paper considering all shifts.

$\bar{M}_{ti}$  = is the average marks of the top 0.1% of the candidates in the  $i^{\text{th}}$  shift (No. of candidates will be rounded up)

$M_{iq}$  = is the sum of mean marks and standard deviation of the  $i^{\text{th}}$  shift

$M_{ij}$  = is the actual marks obtained by the  $j^{\text{th}}$  candidate in  $i^{\text{th}}$  shift.

$M_q^{gm}$  = is the sum of mean marks of candidates in the shift having maximum mean and standard deviation of marks of candidates in the examination considering all shifts.

Sr. No.	Type	Abbreviations	Remarks (Values)
<b>Candidate Wise values</b>			
1	Actual marks obtained by the candidate	$M_{ij}$	This value represents Prorated Marks. Please refer to the published results for your Prorated marks.
<b>Constant Vales (A constant value for all candidates across all shifts).</b>			
1	Average marks of the top 0.1% of the candidates considering all shifts (No. of candidates will be rounded up)	$\bar{M}_t^g$	174.87710
2	Sum of mean and standard deviation marks of the candidates in the paper considering all shifts.	$M_q^g$	144.71903
3	Sum of mean marks of candidates in the shift having maximum mean and standard deviation of marks of candidates in the examination considering all shifts.	$M_q^{gm}$	144.96692
<b>Batch Wise Values (These are the shift-wise values, which differ for each shift).</b>			
1	sum of mean marks and standard deviation of the candidate shift	$M_{iq}$	Please refer to the table below for these values
2	Average marks of the top 0.1% of the candidates in the candidate shift. (No. of candidates will be rounded up)	$\bar{M}_{ti}$	Please refer to the table below for these values

Attached is the example of shift summary basis which normalization has been carried out

Date Shift	Number of total candidates per shift	Mean Value per Shift	Standard Deviation Value per shift	Average of 0.1% Topper per shift ( $M_{ti}^-$ )	Sum of Mean & Standard deviation per shift ( $M_{iq}$ )
04/11/2025_Shift 1	5736	120.23865	23.24010	175.42088	143.47875
04/11/2025_Shift 2	5983	120.74511	25.12451	174.33333	145.86962

**Example 1:** Calculating Normalizes score of a candidate obtained 129.29293 Prorated Marks in 04th Nov 2025\_Shift1:

$$\hat{M}_{ij} = \frac{\bar{M}_t^g - M_q^g}{\bar{M}_{ti} - M_{iq}} (M_{ij} - M_{iq}) + M_q^{gm}$$

$$\hat{M}_{ij} = \frac{174.8771 - 144.71903}{175.42088 - 143.47875} * (129.29293 - 143.47875) + 144.96692$$

$$\hat{M}_{ij} = \frac{30.15807}{31.94213} * (-14.18582) + 144.96692$$

$$\hat{M}_{ij} = -13.39350 + 144.96692$$

$$\hat{M}_{ij} = 131.57342$$

**Note:**

1. Calculation of marks will be done up to 5 Decimal Places.
2. Proration is done for the questions which are been ignored in that shift.
3. Normalization of scores ensures that the marks accurately reflect the candidates' performance relative to the difficulty of the exam in every Shift. The mathematical process of normalization leads to an increase or decrease of marks beyond the maximum or minimum marks.
